get 2<sup>nd</sup> HALF PRICE  
saving £10.00**

**NOW ONLY £29.95**  
(Normal Price £37.95)

### NATURES OWN ANTIBIOTIC

2009 is already upon us, where has the year gone?

It's that time of year again, the doctor's waiting rooms are full of patients waiting for a flu jab or people with nasty coughs and colds, hoping for a prescription of antibiotics.

At the turn of the century Colloidal Silver was widely used as an antibiotic, but in the thirties, research moved over to pharmaceutical drugs. It is now proven that many of these drugs have side effects, hence many people are turning back to natural products.

Colloidal Silver is a powerful natural antibiotic, which boosts the immune system. It will help fight against colds, flu bouts and some viruses. When applied topically it can be used on warts, acne, open sores, eczema and many skin conditions. It can be either taken internally or used topically, where appropriate.

As soon as you feel the onset of a cold, take **Colloidal Silver** in regular, frequent doses and you will soon be feeling well again. It can also be taken as a preventative measure if you have been exposed to colds or flu viruses.

Sizes vary from a handy 50ml handbag/pocket size @ £7.95 to very large 500ml bottles @ £29.95 per bottle

Information Sheet with full price list available on request

# NEW PRODUCT ANNOUNCEMENT

Winter 2009

Life Long Products

Volume 2 – Issue 1

Life Long Products are very excited to announce the arrival of **JointAstin**, a new product containing the proven ingredient Astaxanthin and the well known supplement Glucosamine.

We know how difficult life can be when your joints are deteriorating, you are experiencing pain with every move, sleep is difficult and even just sitting can be painful.

Pain not only effects our movements but also our emotions and moods, it can be a vicious circle of pain and discomfort, spiralling into depression and lack of mobility.

Chronic pain sufferers frequently rely upon pain killers, which can often have terrible side effects and may only mask the symptoms. Glucosamine and Astaxanthin will offer long term relief and will have an accumulative effect.

**JointAstin** is a powerful formula designed to strengthen, support and nourish your joints and connective tissues.

**How does Glucosamine help?** In recent years Glucosamine has become one of the most popular, scientifically researched natural supplements in the complimentary health market. Glucosamine occurs naturally in the body, where it plays a role in the smooth working of the joints and helps maintain connective tissues, however it is important to take Glucosamine as a nutrient, rather than relying solely on our bodies' natural production processes.

**Have you tried Glucosamine before?** You may have already tried Glucosamine but were disappointed with the results. When taking supplements, it is important to ensure that they are of a good quality, therefore the source is very important. The manufacturers of JointAstin are renowned for their high quality health products. Their facility is located on the pristine clean Kona Coast of Hawaii; they operate without the use of pesticides and herbicides in their processing techniques and all ingredients used in their products, are of the highest quality.

## What is Astaxanthin?

Astaxanthin is one of the main active ingredients in JointAstin; it is an exceptionally powerful antioxidant, which will help to protect our body and immune system from free radical damage, caused by modern day pollution and toxins. Free radical damage can speed up the ageing process; cause our bodies to become diseased and affect our body's immune system. Therefore, it is vital that we protect our bodies from free radical damage with a good antioxidant.

## JointAstin can help to:

- alleviate pain and soreness in joints
- alleviate joint stiffness & discomfort
- protect joints from inflammation
- offer long term relief and have an accumulative effect
- support healthy immune function

**JointAstin**, is one of the first non-animal source, completely vegetarian joint formulas on the market. There are **no known side effects** and JointAstin will not effect any medication you may already be taking.
