BioAstin Sun Protection Crème and Aloe Vera After Sun Lotion Information Sheet

BioAstin Sun Protection Crème

BioAstin Sun Protection Crème, which contains Astaxanthin, (the same active ingredient that is in the BioAstin capsules), is made exclusively for Life Long Products from natural ingredients.

When taking BioAstin capsules and using the BioAstin Sun Protection Crème together, not only will you receive double the protection from the sun's harmful rays, you will also safeguard against long term skin damage. We recommend using the crème as a daily face moisturiser to protect delicate skin from harmful UVA Rays.

Apart from Astaxanthin, BioAstin Sun Protection Crème contains pure, natural ingredients, such as Shea Butter and has the added benefit of a sun screen. It is easily absorbed, is water resistant, non-greasy, pleasant to use and has a moisturising effect on the skin.

Recent studies have shown that it is vitally important to expose the body to sunlight, as this is the main source of Vitamin D, which is an important protector against disease. Also it is a known fact that safe sunbathing not only makes you feel better – you will look better too!!!!

Why Should You Use BioAstin Sun Protection Crème?

It is a known fact that high factor creams protect you from burning but although they stop you from going red due to their strength, they also stop you from going brown!! BioAstin Sun Protection Crème will not only protect you, but will help you gain a beautiful and even tan, especially when used in conjunction with the BioAstin Capsules!!

Because it contains only natural ingredients, the cream is suitable for young children, the elderly and those with sensitive skin. For children (of approximately 4 yrs or over) and adults, the BioAstin capsules are also available for sunburn protection and for many other added health benefits.

Coming Soon the NEW BIOASTIN SUPREME – containing more active ingredient and available in VEGGIE CAPSULES also!!!

BioAstin Sun Protection Crème Directions for Use:

Apply liberally before sunbathing; re-apply frequently, particularly after swimming. Please note that when sunbathing, normal safeguards must always be adhered to.

When using the Sun Protection Crème, ensure that you rub the crème in thoroughly, however, if the cream does leave a mark on any item of clothing, do not be concerned, as the crème will wash out easily, without staining.

Aloe Vera After Sun Lotion

Aloe Vera After Sun Lotion has been manufactured especially for **Life Long Products** and contains the **highest quality Aloe Vera**. When used after exposure to the sun, it will cool and soothe hot, dry and sore skin; it is moisturising, non-greasy and easily absorbed.

If used regularly, it will keep skin smooth and soft and will also prevent peeling, therefore helping to preserve your tan for a longer period. Many customers have stated that the lotion is so pleasant to use, that they apply it daily as a face and body moisturiser.

Aloe Vera After Sun Lotion Directions for Use:

Apply liberally after exposure to sun and wind, continue as necessary.

Can also be used daily as a face and body moisturiser.
